

Rescue Operation

Rescue Operation is the responsive act of removing Human, animal or valuable properties from harm's way or a disaster. In some situations, an immediate First Aid is needed while rescuing victims.

Different Aspects of Rescue Operations

1. Rescue from avalanches and glacier crevasses
2. Evacuation from cable cars and chairlifts.
3. Diving Accidents
4. Search and rescue service for missing air craft (SAR)
5. Rescues from caves
6. Rescues from fire
7. Rescue of life stocks.

Securing the Environment

1. People should build houses away from gas pipelines to remain safe in case of gas explosions
2. Living close to electrical and gas installations should be avoided.
3. Every region should have industrial district which is far from residential areas.

Securing Victims of disaster

1. Every organization or station should always have a rally point where people can run to at the outbreak of disaster.
2. Every building must have a fire escape, so victims can vacate a burning building quicker.
3. When victims of a disaster are rescued, the victims should be kept far away from the point of the incident.

Securing your car

1. Cars should always be parked at the parking zones which is always away from buildings.
2. Always have an extra means of lock in your car.
3. Always have a fire extinguisher in your vehicle.
4. Obey the state rules concerning the number of passengers allowed in a car.
5. Never park your car close to fire or inflammable objects.
